Director Dick Pedersen,

Thank you for meeting with us on Friday, February 19, 2016. We appreciate your direct involvement in the process of evaluating the air quality information for Southeast Portland and the operations of our business.

Bullseye Glass is committed to addressing the concerns related to emissions. We have already agreed to suspend the use of cadmium, arsenic, and hexavalent chromium while we work with the DEQ and the OHA to better understand the data related to recent environmental monitoring. Based on Friday's discussions, we are expanding our commitment and agree to stop using arsenic indefinitely.

Additionally, we have engaged Serbaco, Inc. to evaluate and recommend pollution control devices that we can add to our manufacturing process. We look to the DEQ to help us in the effort to add technology to reduce and control potential emissions.

We understand that the DEQ is performing more monitoring tests near Bullseye. Additional equipment is being used that will allow the measurement of hexavalent chromium. We appreciate that your office will share the test data with the community on a regular and frequent basis.

Friday's meeting was constructive. We look forward to working with you and your team to make more progress.

Regards,

Daniel Schwoerer  
Co-owner, Bullseye Glass Co.
